Empowerment

World Summit Award was **initiated in 2003** as an Austrian activity in the framework of the United Nations World Summit on the Information Society (WSIS) and is since then selecting and promoting digital innovation with an impact on society from all UN member states.

The WSA Global Congress Cascais focusses on the part that digital innovation plays in **creating sustainable social change** and impact world-wide . It demonstrates the richness and diversity of best-practice solutions from all over the world.

The WSA Global Congress features the **40 global winners in the 8 WSA categories** and the **WSA Young Innovators** and will connect them with international thought-leaders, ICT experts and local stakeholders to enable a sustainable and transformative knowledge transfer.

Digital technologies are one of the main drivers for the **United Nations** agenda towards the **Sustainable Development Goals** towards the review in 2030.

In Cascais, WSA and its congress participants will present best practices and share experience how social innovation and entrepreneurship can be encouraged and play a key role to have a sustainable impact on society.

Join the event and its unique process of interactive workshops, keynotes, winners' innovation pitches and fishbowl session and **come to the City of Cascais, situated on a beautiful coastline. Cascais is also home to the Nova School of Business and Economics, where this congress takes place, thanks to City of Cascais.**

+ WSA YOUNG INNOVATORS

KEY FACTS

HIGH LEVEL GUESTS FROM THE UNITED NATIONS AND PORTUGUESE GOVERNMENT

- UNESCO, UNCTAD, International Organisations
- City of Cascais and local government representatives

OBJECTIVES

- Be inspired by international techpreneurs, proving that digital solutions can have a positive impact on society
