

GET THE BEST HOTEL RATES

OPERATIONKEY

HOTEL SMART

All your hotel suppliers in one place

Hotel Smart is a very simple application for your travel agency, that searches your hotel suppliers and displays in your screen the best prices and availability. Your travel agency contracts and commercial agreements will be used, so you will not lose the relationship with your suppliers.

Simple and agile operation for increased profitability

Reduce your operational costs and give faster responses to your customers' requests, as you will have all the information and prices in one single screen, instead of having multiple applications. Give to your operation a web based environment accessible anywhere, where hotel fares from the suppliers are compared and the best one is showed. Use the map to search for the best suitable property and book it, sending the voucher to your customer.

Contact us, and find more on how we can help your operation!
